

# FURNITURE & STORAGE

Facility décor and functionality can be as important as the technology we use.

Studies show our environment can affect both productivity and mood. Ergonomic furniture can help customers and employees feel their best while waiting or working. Well-designed storage and filing systems keep files, records, gear, and personal items organized and safe.

We offer solutions that fit any organizational style, function, and space.

Our manufacturing partners are the best, and purchasing is easy through the TIPS National Governmental Purchasing Cooperative.
